Description

This story defines additional fields needed on the new case layout for trouble tickets for the NOC to effectively manage their cases

As A

NOC

I Want

Fields added to the case for trouble tickets so we have the fields we need to add detail around the status, the type of ticket, the resolution and critical dates

Acceptance Criteria

Create Record Type "Trouble Ticket" Update Status field to include the following options (time stamp progression between statuses): - Not Started - Assigned - In Progress - On Hold - GPC - On Hold - Pending Customer - Complete - Canceled - Duplicate (will need a start and stop for On-Hold - Pending Customer as SCC-4166 will need to exclude the time in this status) Service Type (Picklist) - Circuit - Internet - Voice - Video - Fixed Wireless - Wireless - Other Add a Service Address field Add a Priority field (Picklist) - Low - Med - High Subscriber Report (picklist)(See attached - Dependent on Service Type) https://gpcom-my.sharepoint.com/:x/r/personal/amiksche_gpcom_com/_layouts/15/Doc.aspx?sourcedoc=%7B69D34BF3-4221-47A1-8534-9683F3BA446C%7D&file=Subscriber%20Reports%20NISC.xlsx&nav=MTVfe0Y4OUQ1RUE1LUVDNjltNEQ3MC05NjFELTZEMzc1NDg5NEM1Rn0&action=default&mobileredirect=true CIRCUIT RUNNING ERRORS CAN'T LOOP NIU LATENCY/JITTER CIRCUIT DOWN CUT CABLE

@Bryan Hayashi @Janaki Mani @Adam Harp

Hello Bryan, can you help me and Janaki out, we were reviewing the excel sheets that are
attached and we found some conflicting information which is leading to us having a
confusing and failing valiation.

In 1 sheet Subscriber Reports, would have “ALL SERVICES OUT” appear for TV, Internet,
Telephone, but the other sheet NISC Current Resolution, it would have

Primary Resolution		Subscriber Report	Product/
MAINTENANCE COMPLETED		All Services Out, Can't Connect, Channel Buffering, Damage Claim, Email TRBL, No light on Modem, Not connecting to ITV, Other & Misc Voice, Other Misc Int, Outage, slow speeds	

which would seem that All Services Out can be included for all Service Types. This is not
the only instance that this has happened.

Can you help with the confusion or provide a more updated document

@Danny Perez I added an attachment for the updated subscriber report/primary resolution mapping. We don't need to worry about product/service for the primary resolutions. The options are only dependent on the subscriber report. Let me know if still have any questions! I did have to add a few subscriber report options. I can update the story if needed to include the additional values.

@Bryan Hayashi @Adam Harp

Waiting for feedback on how the pagelayout should look for this new record type and what fields to include and arrangement

@Adam Harp

Answer from Byan was to copy the default layout

@Bryan Hayashi I updated some of the above to add clarity and for tracking. Can you please review and approve? Also, regarding this requirement “Update Status field to include the following options (time stamp progression between statuses)”. Are these going to happen in this order or will you note which progression in between statuses we should track? I.e. Not Started to Assigned? Or do you just want a time stamp when it exits or enters each status? What should we do if it goes back and forth?

@Joyce Scigo @Bryan Hayashi - that looks like it would meet our requirements. We need to get this to dev ASAP.

✓ Previewing a limited number of records. Run the report to see everything.

Case History Owner ▾	Case History Status → ▾	Cancelled	Completed	In-Progress	New	Total

Architecture

Solution Review

Approved to use out of the box functionality.

Solution Type

Declarative Only

Architectural Status

Deployment

Testing Recommendation

Test Case 1: Confirm New Record type 1. Login into Salesforce create a new record you will see the new record type .

Test Case 2: Page Layout Will match default along with new section "Critical Dates" that will have the following fields: - Problem Occurred Date - Problem Reported Date - Repair Date - Created Date - Closed Date Fields that will also be visible: - Resolution Detail - Service Type - Service Address - Priority - Subscriber Report - Primary Resolution -

Secondary Resolution - Parent Case Test Case 3: Subscriber Report values will be dependent on Service Type, review excel sheet Primary Resolution will be dependent on Subscriber Report, review excel sheet
